

SIDDARTH "SID" R.

Understanding, Creative, Hardworking

"Take the **odds**,
I'll keep **dreaming**."
- Kevin Abstract

BIOGRAPHY

Now in his sixth year with the 49ers STEM Leadership Institute (SLI), Sid has evolved throughout the years to become an empathetic, perceptive, and dynamic leader, who persistently highlights the concept of mutual understanding with the world around him. Academically, Sid has taken on fifteen AP/honors courses, working hard and consistently venturing out of his comfort zone. He aspires to work both in Psychology and Neuroscience. In pursuing his desired career, he has engaged in programs such as Design the Future at Stanford University and EXPLO Psychology + Neuroscience at Yale University. In his projects, the common denominator has always been understanding people. Outside of academics, he has made an integral part of his life by participating as officers in several clubs such as UNICEF Club, Filmmaker's Club, and Careers in Science. For fun, he participates in the varsity golf team and plays the alto saxophone in marching and symphonic band. Having studied both the alto saxophone and guitar for nine years, Sid participates in multiple music ensembles. In his free time, Sid volunteers, performs and writes music, embarks on impromptu escapades with friends and family, and watches movies.
